- If acne medication isn't working or causing new breakouts, try applying egg whites to the pimples at night before bed. This natural remedy works great.
3. Eggs- try using eggs for microdermabrasion. You can read more about this online, its difficult to explain haha
Any home remedies to get rid of acne?
Stick to products tested and formulated for your face and acne - :)It dries it up and stops inflammation, apply it and leave it for 2-5 minutes and wash it off. Don't leave it over Night. That can mess up your skin. Visit [Http://SmoothMoistSkin.com](http://SmoothMoistSkin.com) for more information.The toothpaste gets rid of the redness on your skin and it also helps to dry up the acne. I would apply it at night before you go to bed. It won't come off until it is washed.
Pick up a solid face wash (acne) clean and clear, Nutregena
2) Revlon ColorStay Active Light Foundation - SPF 25 (Sweat Proof, Rub-Off Proof, Even During Exercise!)
ProActiv or Kiehl's are the only products that actually work, but they are expensive.
<http://www.wellnesstalk.org/acne.html>Hey i had that problem before and just let your acne go away on its own...But if u don't want to do that then you can put tooth paste over night to dry out the pimple.But make sure it's the regular kind and not the gel kind.Also make sure that your pillow cases are always clean and dont touch your face alot or it gets worse.Also drink alot of water.You can also use a face scrub to help like clean and clear.Dont pop your pimples either.Also at walgreens they have a variety of choices for acne problems.Also for the dark circles try cucumber slices and place them on your eyes for like about 1 hour a day.Or you can use ponds for 3 weeks everyday.Ponds will even out your skin tone.try using stuff called witch hazel. its inexpensive and its really effective. you can find it near rubbing alcohol in most pharmacies. you just rub some on the problem areas and let it soak in. use it like twice a day nad a difference will show in like one to two weeks.Try this simple remedy. Wash your face twice a day in warm salty water. This should leave your face oil free without aggravating the acne like soap. The secret of keeping the skin clear is to keep it oil-free and clean. Check out <http://useinfo-acne.blogspot.com/> for more useful info.I'm twelve and I have really bad acne. I stayed on everything I tried for like 2to3 months but nothing worked. The pimples I get stay for about a month even when I pop them.The tricky part about acne is that the problem can actually become worse if you overmedicate. That's because acne medication can overdry the skin, causing a boost in your skin's Sebum (oil) production. This results in...you guessed it - more acne.
Clearasil Extra Strength face pads work great. It may burn your pores until you get used to them..
